ANTF VIDEON DATA FORMATTING GUIDE

Part 1: Understanding the Directory Layout

Below you will See a Representation of the Scheme of the Directory layout for the folders. The NAMES MUST MATCH!

- Movies and Shows   (Parent Directory)
  - Media Artwork
    - MovieArt
    - TVArt
  - TV Shows (Coming Soon)
  - Movies
    - Action
    - Adventure & Fantasy
    - Comedy
    - Crime & Gangster
    - Documentary
    - Drama & Thriller
    - Family & Animation
    - Foreign
    - Holidays
    - Horror
    - Musical
    - Romance
    - Sci-Fi
    - Stand up comedy
    - Superhero
    - Western

All of your movies should be placed into one of these genre categories! You cannot create additional genre categories. When you have this complete, proceed to the next part.

Part 2 (Optional): Movie Identification

To encourage neatness and add to the overall visual appeal of the system, it is often helpful for movies to be properly named. Not like for example "x_VID1080p_BR_Limitless"2.avi, but rather should be renamed to something like "Limitless 2 (2010)".avi. This of course is an optional and very Time Consuming Step but it will make searching for a movie much easier, because who want to type and or remember "x_VID1080p_BR_Limitless" when you could just remember "Limitless"? While you do not have to rename files in the manner shown, it is the best manner for consistency and extra detail. This step Coincides with Part 3.

Part 3: Movie Covers (The Most Time Consuming Part)

As you may have seen from screenshots of the application, the movies are represented with movie covers. The application obtains these covers from the MovieArt and TVArt (respectively) Folders you created earlier. You will need to find a .jpg (not .jpeg) or .png image from the internet for each movie. The Image must also be renamed to be the Exact same name as the movie file. In other words.. if the movie file is Limitless2.mp4, then the cover should be Limitless2.png (or .jpg). and then placed in that folder. If you choose to skip this step, all movies rendered will be rendered with a drabby default cover and it will not look very nice.

Contact ANTF at support@antfcorp.com for a Zip file for a library of a few hundred movie covers (assuming you followed the naming convention expressed earlier for movies)

Additional Notes (and a word on TV Shows)

If the steps addressed are followed, the end result will be a very seamless experience.

For TV Shows, you only need an image for the show, not every episode (named the same as the folder.) Each TV show is placed within it's own separate folder, and you can have sub folders for each season of the show if applicable. While the TV part is not yet developed, it will most likely follow this scheme.
